Java Developer

Dollop Infotech Pvt. Ltd. Indore

Working in Monolithic architecture responsible for developing backend applications using Spring framework, Hibernate,Spring boot, Data JPA.

Use Java/J2EE Technologies to develop web applications for client server environments and add functionalities to existing applications.
Working as a backend developer in a product team in an agile environment.
Working closely with backend and Product Managers to ensure timely and accurate delivery.
Initiating tasks to improve existing architecture and code base from both developer's and End user's point of view.
Completed assigned tasks before the given timeline.
Quickly adapted to a fast-paced environment and ensured smooth onboarding to new app users.
Appreciated by the Product and Engineering Manager for giving deliverables on time with a minimum number of bugs.
Designed and built application software with minimal supervision.
Delivered, analyzed and resolved technical issues, and participated in continuously enhancing established development processes.
Worked with the Quality Assurance team to determine if applications fit specifications and technical requirement
Teck Stack Used – Spring Boot, Postman, Java 8+, Maven etc. Received appreciation from client and Learner's award for multiple learning within a short span.
Tools– Postman,Git
